Project Name	Project - Signs with smart connectivity for Better road safety
Maximum Marks	4 Marks

Signs with smart connectivity for Better road safety

The screenshot displays the IBM Cloud dashboard for user GANESH RAJ S. The interface includes a top navigation bar with the IBM logo, search bar, and account information. The main dashboard area is titled 'Dashboard' and features a 'For you' section with five recommended services: 'Build' (Explore IBM Cloud with this selection of easy starter tutorials and services), 'Build a web app with Watson Speech to Text' (Deploy a conversational interface compatible with any application, device, or channel), 'Get Started with Watson Studio' (Get started with using AI and Cloud Object Storage in 15 minutes), 'Build a virtual machine' (Lift and shift your VMware workloads to the IBM Cloud), and 'IBM Watson Internet of Things Platform' (Communicate with connected devices, monitor and analyze data in real time, connect your own IoT apps and add Watson AI to the solution). Each service card includes a 'Getting started' button and a time estimate. Below the 'For you' section, there are four more sections: 'News' (SLSA Support in IBM Cloud Continuous Delivery, WebSphere Application Server Support Restatement, IBM Adds Lifecycle Services to Enterprise Networking and Deepens Strategic Partnership with Cisco), 'Recent support cases', 'Planned maintenance', and 'IBM Cloud status' (World map showing global status). The bottom of the screen shows a Windows taskbar with the date and time (12:33 PM, 15-11-2022).

Cloud Foundry

Public

Deploy and run your applications without managing servers or clusters with IBM Cloud Foundry

Cloud Foundry automatically transforms source code into containers, scales them on demand, and manages user access and capacity.

Cloud Foundry in the IBM Cloud

Public Applications

Create and deploy apps on IBM Cloud's multi-tenant Cloud Foundry environment available in 5 IBM Cloud Regions. Get started in minutes by deploying your applications, and let IBM Cloud manage them for you.

IBM Cloud Foundry Public is being deprecated. Please see full details.
