

Assignment-2 Python  
Programming

AssignmentDate	19September2022
StudentName	Ann Edwin Joshwa M
StudentRollNumber	95071914010
MaximumMarks	2Marks

Build a python code, Assume you get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect a alarm in case of high temperature.

```
import random
from time import sleep

def generate_values():
    temperature = random.randint(14, 50)
    humidity = random.randint(10, temperature)
    return humidity, temperature

humidity, temperature = generate_values()
print('Humidity:', humidity, 'Temperature:', temperature)
sleep(0.50)
print('High Temperature Detected')
```

OUTPUT

Humidity:28 Temperature:30

Humidity:13 Temperature:19

Humidity:19 Temperature:46

High Temperature Detected

```
Python 3.7.0 Shell
